

101

IDEAS 08-11-24: Could tax flow be automatically partly fed back into the system to stabilize the economy, eg at 20%?

08-11-24: Automatic height-matching apparatus maybe by selective bleed by 2 (3?) billboards?

08-11-25: Name for strategic withdrawal of bad head of state for period (3 years?) of banishment & non-communication: Cosmic Extraction (arcane).

08-11-28: The best way to dispose of pollutants radioactive etc, w to dilute them down to harmless (?) levels?

08-11-30: If human chromosome 2 is the fusion of two chromosomes in other great apes (whence human N=23, other N=24), then chromosome counts for Woy/...pithecia, 3 mya, Homo floresiensis etc will show whether such should/should not be closed a 'Homo'!

08-11-30: Proposition: take-up of an 'improved' theory is only ca. 2% per yr. eg if the improvement is 10% take 4 yrs. if 100% takes 40 yrs. Now go for filling theory over.

IDEAS Unwanted entities (pests moulds their equivalents in more complex systems) may be best controlled by introducing out-competing entities which do not present the same unwanted effects. 08-11-16.

08-11-17: Is heat radiation emitted in quanta, and at low temps subject to similar laws to radioactive decay?

08-11-17: 'Bubble economies': system stability buffers are contained in their skins - only a limited stretchability exists if exceeded, bubble may collapse. Eg Japanese economy in the 1990s. Present world global economic imploded. Present world global economic meltdown - whole world bubble. Alternative measures: make system skins purposefully leaky, provide relief valves, venting into cop outside system.

08-11-22: Is there a food source in fermented tree leaves in trees where annual plants are difficult to grow?

08-11-22: Weather forecasting made to work although chaotic with global sea level + massive computer power. Do we need the global economy?

IDEAS 08-12-1: Rent Christmas trees in Euro, including delivery & collection?

08-12-31: The 2-balloon aerostat: maintain height with sprung seals adjusting separation of the 2 components? Power from mobile-phone batteries, with solar-cell recharging?

08-12-6: Require a 'minimum threshold' level of government to avoid international etc intervention?

08-12-10: Make rain with tethered balloon (dimpled electrostatically charged, mist-netted, self-stable adjusting)?

08-12-18: Share market/bur service analogy - disrupt by divisible buses / best bus stop/randomize timetable/randomize fare paid (\$28, 10c).

08-12-23: It's widely recognized that the plant kingdom contains a vast wealth of biochemicals but usually only the above-ground parts are considered. In fact the roots contain the most active portions, and hence an even bigger biochemical resource.

08-12-31: Calculate Earth rotational energy from angular momentum of primeval cloud.

IDEAS "Capitalism is only good within a society which has capital"

09-2-13: The most stable place for funds to sit, in economic crises, is in land and property owned jointly by a funds holder and a person (or 3s) joint tenants (the Holdman scheme) (the dwellers, the Pool)

09-2-15: Could major stock exchange collapses be averted by the equivalent of 'preventative burning' in forests? If so, what is/are the equivalent?

09-2-15: Derive refractive indexes from atomic nuclei size & mass & gravitational attraction?

09-2-18: Re bullfinch - giant pulse-throw sprinkler at 45° with interrupted streams to low Vegas fountain?

09-3-7: If alcoholism tendency is a genetically-based thing could groups at risk (aborigines etc) be inoculated against it (cf measles) before the age of (say) two?

IDEAS 09-1-24: The permeability of system boundaries must be continuously monitored and adjusted for optimum system benefit.

09-1-29: Housing: the Holdman scheme/joint tenancy approach

09-2-7: Roman arches - Voussoir (wedge-shaped units) filled with water (maybe after erection plastic shapes)?

09-2-8: Re bullfinch device (compressed air + water to give mist, maybe bubble/foam (hard shell) more effective)?

09-2-9: Why is the Moon moving away from the Earth? And why isn't the Earth moving away from the Sun (or is it)?

09-2-11: Re bullfinch, via preform or generate foam/bubble blankets, maybe aerosols? Bubble, Na₂SO₃ + CO₂?

09-2-13: What's the composition of interplanetary dust? Does it have bearings on composition of the crust?

IDEAS 08-10-10: Possible to drastically reduce water needs of field crops by seeding on to soil layer eg 10cm over plastic sheet and feed water from higher level on sloping site?

08-10-14: Why is Olympus Mons on Mars still 27 km high? Is it subject to little erosion, or still being pushed up? [Wikipedia: since 1960s only 2 my old, still active] [Reaches above 100 dust storms].

08-10-16: Make 'Intellivcreens' by 3-D printing successive layers of pattern elements of a side able to focus/change/adapt incoming streams (of matter particles, light, ultra-EM radiation, molecules)? Remember 'refraction' occurs over a boundary comparable to wavelength.

IDEAS 08-10-23: Tackle fly strike on sheep by eliminating the flies (dung beetles) rather than mulesing?

08-10-26: Solve financial bust/boom by fixed (chaos-theory) pumping, re eliminate random tipping points by square-wave uttling? Eg all major state contracts start July 1, medium National ones on Jan 1, major National ones on 100+ '05?

08-10-28: The Zimbabwe/Mugabe problem could be solved humanely by inviting Mugabe to a dirtiest land and keeping him there for 24 years. Zimbabwe would have to act as if he had temporarily died or was in a coma. No country's operations should depend on the exit time of a particular person.

08-10-28: Re 'incompetence' procedure to unlink people or exist for legal & medical cases - political equivalent.

IDEAS 01-1-19: Stabilize housing through 'house companies', with part-individual, part-government owned 'companies' each owning a property as joint tenants or tenants in common. Individual must be natural person. Share of property gradually transferred from person or person pays from earnings (and perhaps 'super') period rights increase with % owned. Ownership vested in 1000 shares, tax-free xfr of shares Gov pays. If person unemployed, transfer (of 'ret' shares) may cease.

09-1-22: Vacuum freight corridors essentially air-pressureless vacuum balloons stretched out into corridors, these carrying freight 'bills' (able to tolerate vacuum) with intermediate exchange chambers. Maybe more bills by 'peristaltic' action along freight corridors.

09-1-24: Could useful comparisons be drawn between the progress & outcome of a disease attack and civil/other wars, including incubation periods, symptoms, various treatments?
