119

IDEAS | 99-7-26: (Argon?) Cool gas(if cotton) by bacteria etc; → gas turbine power generation (less cooling water needed)

Chestnut blight - trying cultivar Am. chestnut, use somaclonal variation to select ones with blight resistance? 99-7-26

Cutting chronic thro' potato discs? 99-8-23

99-9-16: Solid tree guards (Re-usable, no support)

← 2 sections of clear(?) plastic pipe with sharp ends driven into ground and then taped together.

99-11-23: Protect orchards from frost by creating artificial/synthetic cloud layer above them? 99-12-6: "Combine harvest" olives in the tree rows, returning all fruit to the land?

IDEAS | 99-1-28: Vacuum balloon as habitation flagship for a fleet of automated fishing or other marine vessels? 99-3-22

Commercial prod^n of fungi on council waste paper collections? 99-3-29

Copper-treated cloth around/under tree planting to restrain roots, ingress of foreign roots? (Use woolbale?) 99-4-14: Dried oarweed products, eg clips?

97-4-23: Air-layer with shredded paper instead of peat/soil?

99-5-6: Sugar on papaya?

99-5-8: Suburban water → use on BCW site 99-7-8: Reduce hunger by inserting (inflatable?) bag to restrain stomach?

IDEAS | 98-8-23: Multiply grafted or other trees/seedlings by vertical splitting, so some root/top on each piece? Maybe seal off cut surfaces?

98-8-30: Regular drainage of seminal fluid alters prostate problems?

98-9-9: Levee consolidation with productive crop trees?

98-12-19: Cyclones: inject a substance/energy source/absorbent to induce collapse? 99-1-18 Develop stress treatment (phytochemical physical?) to induce lateral branch, then air-layer for propagation.

IDEAS | 98-6-3: Apply fruit-fly eggs substance to make fruit abscise? 98-6-27: Self-Inflating parachute cf. inflatable umbrellas for emergency exit from high buildings? 98-6-29 - Use squirrily blood as fungus-deterrent to combat plant diseases

98-7-3: Graft with double-threaded screw? (holes drilled in stock & scion)

98-7-3: Mush up shoot material as graft/bud adhesive/healing agent?

98-8-16: Gravity-flow water as ord etc - in flexible plastic sleeve only? 98-8-20: Prostate problems relieved by ejaculation?

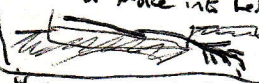
IDEAS | 97-11-12: "3-D" electrophoresis, gel chromatography etc, with sensors in place of staining & visual scanning (or time/pattern)

97-11-12: Use horsetails (Equisetum) for commercial gold extraction - have 250 gpt gold, most notable gold extractor. (Or to test soils for Au?)

98-1-12: Replace cable TV cables by low-power coded TV transmitters as cellular phones? (esp. HDTV) 98-2-6: Copper-foil band round trees deters snails - make batteries of alternating zinc/copper/? layers to give electric shock?

98-2-13: Laser steam engine: piston or turbine engine water injected flash-vaporized with laser burst 98-3-22: Pass strawberry matrix - cuts & fills behind it (except at start).

IDEAS | 97-10-7: Trench pecans to make into hedgerows?



Leaf fall is "probably triggered by short daylength, lower light, lower temps". Cause dormancy in temperate fruits in subtropics by reducing daylength? Oriented slots? 97-10-10 Blueberries etc

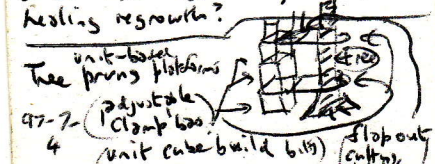
Carotenoids are located within chloroplasts or chromatophores. To preserve a mutant carotenoid phenotype, this implies female (ovary) parentage is required 97-10-14

97-10-14: Wind etc stability in plastic greenhouses by using water-filled sections? (Dimensional stability with inflated ribs). 97-10-16: Reduce bioweight by reducing effect of gut bacteria with mild suppressant?

97-10-17: Plastic tunnel houses on PVC pipe bent under [illegible] flexibility, stabilized by filling lower pipes with water?

IDEAS | 97-7-4: Fell trees with very slanted ground cut to encourage single-shoot, self-healing regrowth?

Tree prunes platforms unit-based

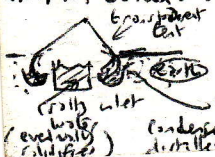


97-7-4 (adjustable clamp bar) (unit cube build bits) (flapout cutting platform)

97-8-14: 1) Timber harvest - de-barke & de-branch standing trees & leave to dry in situ (good for dense stands?) 2) Saw tree into cut timber lengths (live) using vertical Lewis-saw frame.

97-9-2: Focus infrared lamp on graft union to promote growth?

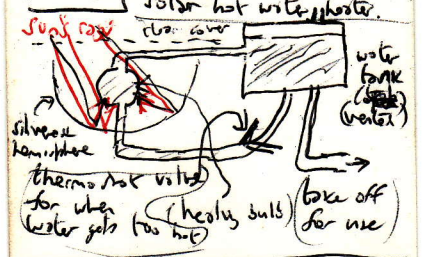
97-9-11: Solution fog transparent tent



nursery: tunnel tent to distil pot inlet water recover salts

salty inlet water (evaporating chillers) condenser distilled water channel water vapour flow into

IDEAS | 97-6-17: Alternative solar hot water heater.



97-6-22: Eliminate weeds by spraying with light-blocking substance, eg carbon black + PVC? 97-6-22: Grow human organs by discovering chemical/physiological sequence by which organs grow from fetal cells?

97-6-25: Make fridges more efficient by fan on cooling coils?

97-6-28: Grow vesicles in poles on poles to avoid shake probs? (Eg. [illegible])
