103

IDEAS | 'Skyhabs' or 'Skydomes' – living habitats up to ca. 2km in the sky, supported by hydrostatics or vacuum/hydrogen balloons. Power from solar & hydro (from water condensed from clouds etc). Solar shutters to admit pleasant amount of light, perhaps small fire pressure to maintain dome, improve breathability. Good temps in tropical areas. 08-2-4: Floating remote-control 'peacekeepers' for Afghanistan, Gaza etc? 08-2-11: Water-filled double-glazed windows as power source? 08-2-24 What does polarization mean or imply for non-visible EMR, eg gamma rays, microwaves? 08-2-27 The xeeplotes (octus) - have to push past at least one arm often more, to get acceptance. Each arm represents one of the obstacles to acceptance - SIDS, money laws, control laws etc.

IDEAS | 08-1-19: Encourage transferability of mortgages from one house to another? 08-1-19: Forget quantum computers, store information in a synapse-type network instead? 08-1-20: Adjust stomach flora of cattle etc so they produce more CO_2 rather CH_4, and hence abstract more energy from their food? 08-1-22: Inoculate children against smoking, alcoholism, etc? 08-1-31: The real radius of the Earth is ca. 145 km less than its sea-level radius as the ocean-water must be neglected (→ atmosphere). For accurate value, need to integrate over all solid surface. 08-2-3: Water-filled window glass to improve heat/cold insulation? (Also possibility of curvature in fixed windows)

IDEAS | 07-11-12: Hand-operated desalination/membrane pump to produce good water from any source? 07-11-16: Is the Sun one of a binary pair, where the other member has not been identified? 07-11-17: Are black holes the galactic factories which turn ~~dross~~ radiation back into matter? 07-11-17: Are the 2007 USA house price decline the 2007 Japanese ~~low~~ super-low interest rates & the 19% leaping float of the Aust dollar (with great depreciation vis-à-vis overseas) all examples of unconscious recalibration of infocap stock for the nation? Inclusive? 07-11-16: Segway wheelchair could also be fixed to climb steps, as step trolley. 07-12-31: Fast broadband via fibre to the street + wireless to the home, to avoid Telstra copper monopoly. 08-1-9: CMBR (cosmic microwave background radiation) from interstellar/intergalactic hydrogen at 2.7°K?

IDEAS | 07-10-17: More upright, higher-seat wheelchairs with better small-space accessibility based on Segway scooter control? 07-10-30: Technique of critiquing critiquer - 'reverberation of', 'ping-pong critiq', 'echo critique' ... 07-10-30: Is the mass (dark matter?) at the centre of the galaxy partly just the mass equivalent of the intense rotation energy? 07-10-31: Were the Lascaux (?) cave paintings in France done by Neanderthals? 07-11-4: Redshift, gravitational lensing, refractive index, double refraction etc all aspects of em radiation passing by mass aggregations? 07-11-4: Movements of nutrients ~~from~~ into an adjacent system can be treated as osmosis into higher-concentration envelope? Hence osmotic pressure laws analogues apply? Re red shift/gravity, could a 'reciprocal space' treatment be useful? 07-11-4

IDEAS | 07-9-26: Check how chemical compositions of stars (from spectra) compare with those of MORB, average crust. 07-9-26: Why are digital/electronic telescopes so long in coming? 07-9-29: Look at contour maps of Venus, see if similar to sea/land contours on Earth (expanding Venus). 07-10-3: Why do cars even need starter motors/batteries? Are there alternatives to get a motor running? (cf electric motors, Mercedes compressed-air starter) 07-10-8: Can the 3-(poly-)body gravitation problem be handled by replacing gravity fields with something like electron-density patterns, perhaps 'sticky' patterns? 07-10-16: "Infocap depression pan" image for high-demand areas as in Pilbara – sides of higher areas cave in or slope more.

IDEAS | 07-1-11: Does coating seeds (eg brazil nut kernels) with chocolate preserve their viability? 07-11-13: Reduce transplant tissue rejection by amending rejection mechanisms with new tissue? (in advance?) 07-1-16: (Again) Floating rafts of fruit trees on the ocean, move to get right climatic conditions, near markets. 07-1-16: Evacuate all air from fruit container for a minutes to eliminate pests etc? 07-1-16: Underground greenhouses - intervene coloured filters in the light-well passages to get particular effects (see article in Qualdong 2002/1)

IDEAS | "We must" 07-9-10 – be careful with people who insist that 'We must ...'. 07-9-15: Could miners (- deposit potential) be checked with tailored microbe mixes applied to local soils or samples of rock powder etc to yield indicators of mineral content? 07-9-22: Investigate photoelectric effect (eg electrons emitted from metal surface if illuminated by blue light, but not by red) for a better concept of quanta (energy-packet) size. 07-9-24: Is 'cosmic background radiation' originating partly or wholly from black holes etc which red-shift all radiation down to microwave freqs? 07-9-26: An expanding Earth means the definition of a metre as 1 ten-millionth of the pole-equator distance becomes less accurate each year. Wavelength scale OK?

IDEAS | 07-3-21: Re long-distance light delivery via intercontinental optical fibres, as fibres tuned to most efficient for particular frequencies may be best to have RGB colour-triplet fibres. 07-3-22: Optical-fibre energy cable to Antarctica etc to melt ice? Fibre with round central pipe to return water to Arc? 07-3-31: Generate electricity on home scale using fuel cell running on natural gas supply. Or emergency generators? 07-4-6: 3 levels of belief - A, scientific theory; B, political policy; C, religious dogma. A should yield to logic, B to political pressures, C to what? Generational renewal? 07-4-7: An underwater bridge/tunnel for the Straits of Gibraltar?
