

IDEAS 07-1-22: In hydrogen lift vehicles, buoyancy could be adjusted by liquefying/evaporating part of the hydrogen.

07-1-30: A deep-rock drill which nibbled rather than ground?

07-2-10: Re-managed investment schemes offer similar scheme (60% initial box deduction etc). Offer company investment in companies etc. doing R&D/venture capital activities.

07-3-16: Peaceful relations between countries, provinces(?) by UN-arranged exchange of (non-refugee) situations between entities.

07-3-20: Best place to draw underground water for Perth from where south Meads granite etc under coastal plain?

IDEAS 06-12-15: Locust control by vacuuming them up?

06-12-26: A high-branch cutter which clamps on the exact side of the branch? With flexible lead?

06-12-30: Cleared mica sheets are atomically flat (and rightly flexible) - could this be used in optical devices (eg silvered surfaces) or by using silvered atomic separations involved in flexing?

07-1-7: Would heating via long-term immersion in salt water? How do fish/water heat?

07-1-7: What does reversal of the Earth's magnetic field imply re underlying mechanism? What makes N & S?

07-1-11: Waldar operated by workers living in lower-labour-cost countries?

07-1-17: Many refugee/immigration problems stem from disparity of individual infocap contents

IDEAS 07-8-10: Do most/many cosmic rays originate from galactic spindle plumes? With ultra-shortwave-energy rises in the radiation preferentially from the poles? Hence, are the x-ray/cosmic ray energy sources we see the ones that happen to be poles?

07-8-10: Sugarcane - excellent biomass fixing route, better used for fuel, chemical etc. in preference to food.

07-8-17: Run microscope etc picture-window videocams via Bit Torrent?

07-8-23: Give out free DVDs of movies etc, financed by ads within the shows.

07-8-31: Localized (food equivalent) high areas of infocap (infocap mountains/infocap ranges) tend to dump to make high points, spread out infocap.

All "Green Zilla" take over the earth?

07-9-8: Does the ice temperature rise as you go down within the Antarctic ice sheets etc? Is this why Lake Vostok?

IDEAS 06-9-24: 500-yr ice/warming cycle due to Gulf Stream slowly affecting more & more northerly areas, but through a neck which chokes off to bring basic cool conditions?

06-9-24: The fact that spiral galaxies have a spiral shape does not mean they are rotating - outside relative to inside yes, but this rotation under gravity, not implies it.

06-9-24: 500-yr cycle ends when Pacific warm current finally meets Atlantic warm current at Severnaya Zemlya? (see Colin Campbell World Atlas p. 245).

04-10-20: The Hydrogen tower - very long (high) tube filled with hydrogen (or with hydrogen rib/panels). Should reach at least 50 km high, maybe more since the pressure at bottom lower than bottom, as atmosphere.

IDEAS 07-7-23: Do nitrogen isotope ratios in fossil plants give a clue to the proportion (size) in from lightning-origin nitrates as opposed to sources from decay etc? This could give a clue as to whether Pleistocene/Mesozoic climate had a permanent cloud cover with no lightning?

07-7-25: Excess gas retention in the bowel effectively treated with yoghurt, especially 4-culture yoghurt. Does this alter the methane content of faeces?

07-8-9: Effecting societal change needs to take into account an analogue of heat capacity - 'change capacity' or 'infocap capacity' perhaps. Change may require decades-long bleeding out of infocap, and bleed rates will vary with individual's age/maturity & national/ethnic mindset.

07-8-10: Emission of ¹³C plumes from the sites of galactic-centre black holes is the vital part of mass/energy conservation/balance in the total universe?

IDEAS 07-7-10: There might be a fertile area for Australian broadacre farmer if a mechanism could be worked out to get them to move part of their production to base products - again, stability through diversity, less dependence on no deposit, no fruit etc.

07-7-16: Artificial hedgehog spines for lighting spacecraft etc (Parker, p 65)?

07-7-20: Rather than dump toxic wastes better to dilute them below toxicity level.

07-7-20: SIOS/faith conversion via over-border education, scholarships, eg Aust pay for 20 bright Iranian chosen by Iranian Govt to do a degree in Aust each year.

07-7-23: Build up a complete(?) simulation of the world ('Second Planet') to 'Second Life' & use this to investigate planned social changes, resource extraction, etc.

IDEAS 07-5-5: Is 'cosmic microwave radiation' just partly or entirely the radiation from 'black holes' which has been intensely red-shifted?

07-5-5: Gravitational lensing of stars real enough, but how does it work, ie what theory shows how gravity can bend light, and to what extent? Also, if massive star can bend light, the surely all masses will cause a similar, if weaker, effect?

07-5-10: "Changing your mind can be a lot of bother."

07-5-14: Is the "different" body lice DNA from Neandertal body lice origin?

07-5-18: Tugsten bronze + acid-etched Al between glass for a working self-opaque window.

07-6-25: Infocap has many of the characteristics of matter & gravity, small 'masses' being pulled in towards large concentration of mass.

IDEAS 07-4-23: Solar system form from clouds of dust, gas etc due to long-term gravitational effects from the surrounding universe?

07-5-8: As stars repellant, broadcast electric pattern of choric energy?

07-5-7: What causes substances to be black (light absorbant) or white (reflective)? Complex-charged particles easily absorb photons.

07-5-26: How does platinum work as a catalyst in car exhaust, fuel cells, etc? Is a replacement/improvement to be found in activated carbon/synthetic elements?

07-6-1: As languages become older, they tend to lose sound diversity (eg Hawaiian, Greek, Chinese) unless constantly expanded by imports (eg English).

07-6-1: A reversal of polarity of the Earth's magnetic field could cut out all shielding of high-energy stuff from the sun etc, & cause huge havoc. Investigate.
