"Infectious pressure" basis of economic forces/events 06-5-29:

Bells. Why do bells, and other objectifying like a bell? Is it a matter of a rigid, homo-geneous solid? How can this be used in diagnostics etc?

06-5-30: Photosynthesis occurs in 5&6 membered ring compound called chlorophyll, based on a Mg atom. Absorbs at ca. 425 nm (blue) & 680 nm (red). Synthesize a chlorophyll analog able to absorb at other wavelengths?

06-6-28: With H2 fuel-cell powered vehicles, use braking dynamo to produce more H2?

06-7-4: Reduce appetite by swallowing something to linger in stomach a long time (if inflated in bladder) but harmlessly digestible? Beans-coated gel? 06-7-5:

06-11-16: Is all cell replacement in organs via stem cell supply?

06-11-20: Stem cells of the mind needed to maintain judgement ability in the face of irreversible (brain-put-into-routine) set. (x-ray word for this?) (mental constipation?). Normal cell replacement can't restore discrimination ability in face of new evidence/reasoning. One approach - need an 'epiphany' - "induced epiphany" as per induced religious experiences by selective brain-area stimulation. Need theory of discrimination, based on array of mental elements, and system equivalent of this.
