

107

IDEAS OS-8-4: Test for foetal defects in mother's blood or amniotic sac clearance? How is foetal stuff eliminated/neutralized?

OS-8-7: For rock mining, shatter face by impacting with accelerated rock bits?

OS-8-10: "Intelligence is not an especially useful survival trait in a highly ordered society". OS-8-11: Cost-of-living in a society is directly proportional to its infocap content? Or infocap density, rather? OS-8-18: Check that parents is child's DNA, find why not rejected, see if that facet can be exploited. OS-8-21: Use breed of dung beetle or digger to clear up animal crutch shits & avoid fly strike?

IDEAS OS-7-6: Generate hydrogen color/energy in theory w. vacuum balloons?

OS-7-7: Find out how superconductivity works

OS-7-10: Terrorists want public attention, most counter with some measure to supply this painlessly.

OS-7-14: Use ground/high altitude vacuum balloon temperature difference to drive thermocouple power? Is there an equivalent situation in nature?

OS-7-22: Saving irrigation water by controlled collection of tree evaporation - wire nets/grids, water-filled plastic panels etc. Make them self-maintainingly through the day?

IDEAS OS-6-6: For homosexuality on the increase or one of Nature's ways to combat the ever-increasing world population?

OS-6-6: Re-examine check of correlation between fertility rates (gross, sperm etc) and degree of crowding/pop. densities, city/country, nations etc

OS-6-10: Store publicity ideas; let customers use a photo digital camera setup to record themselves with a selection published each week in local rag (or paid ad)? OS-6-21: Grow carrots, veges etc on v. slow-moving conveyor belt with eg 30cm of soil mix, balance growth cycle (to days?) from start to end when product drops off end into separation machines. Add fertilizer etc through of appropriate times in cycle. (Fixed spray pattern)

IDEAS OS-1-15: Offer legal services etc via Indian call centre? OS-1-15: MT 'squeeze' builds up a head like lava which must be dissipated if not to lead to crisis/catastrophe. OS-1-18: Masking road small mistakes is like applying Natural Selection - 2 small polka dots give an improved result. OS-1-18: Is there an application for B22 biplanes in wind turbine technology?

OS-1-22: Do mosquito attack upper storeys of multi-storey buildings as much as lower storeys? If not why not? Can this be used to reduce attack? OS-2-2: Sleepiness of land directly indicates its time of exposure to erosion; Mountain range ages linked by animals to their "integrated" slopes?

IDEAS OS-5-14: In gaining acceptance of new/improved ideas/scenarios the urge for novelty or distinctiveness may be as important as the urge for betterment. OS-5-14: Tackle weeds from the roots, rather than the top?

OS-5-16: Tavel dry (themselves) quickly because fibres pile sticking out enhance evaporation? Use principle elsewhere for drying, cooling? OS-5-23: "The affairs of a nation may be affected by its 'subconscious' at least as much as that may be true for an individual". OS-5-26: Beta-decay energies reflect the energy needed for an electron to enter a nucleus and fuse with a proton (yes, obvious, but...)

OS-6-3: In system conflicts, eg obnoxious v. rest in WA, most effective measure to reduce conflict will involve tackling the complete system.

IDEAS OS-4-6: Compressed H₂ in a multilayer container where H₂ must leak through slowly from high-pressure to low-pressure areas (a safety measure)? OS-4-10: How far below permanent areas has the temperature risen above 0°C? Can this heat be conveniently used? OS-4-24: Remove scratches from shop windows etc with very localized laser-melting? OS-5-3: Dendrochronology from divisions on bark, root, crown. OS-5-5: Would supplying high-oxygen atmosphere to new-born babies increase their IQ? OS-5-14: Do belief structures (eg Big Bang) build up like systems with one dominator (who owns its merits)? Or like dominant molecule, etc, with upcoming youngsters snipping away until...

IDEAS OS-3-26: H₂ generation directly in some sort of solar cell in water/diatomite/hydrocarbon? OS-4-2: Investigate Britium in Samolunmerence, ald-fusion... OS-4-3: Is there a minimum level of synergy needed to make a democracy viable? OS-4-4: Compressed hydrogen gas would have an additional energy source in its compression and its release would also cause cooling OS-4-6: Smaller & smaller sheets = greater surface/mass ratio = more wool per kg of animal OS-4-6: The surface area/mass ratio probably the cause of decline of (large) dinosaurs under different radiation conditions OS-4-6: If traditional wool production is trouble, look for a synthetic fibre production method giving a much closer analogue to wool (eg silk/bamboo)?

IDEAS OS-2-24: Domestic size solar tower? OS-2-25: Minute optical fibre bundles terminated by photo-electric spurs or replacement for non-functioning sensor bundles as optic nerves? OS-3-8: Kieselguhr + PVC glue v. prop to discourage aphids, scale, ant pests? (cf. 'Pun-oid') OS-3-12: Overhead plastic 'pipelines' carrying H₂ ex electrolytic viter? (ie hydro-power, solar, wind tower etc, using excess over local needs) OS-3-14: Would hydrogen pipeline + local fuel-cell generate more work out cheaper than long-distance powerlines? OS-3-16: Could penicillin sensitivity be brought on by lack of exposure when very young? (cf poison ivy)?
