

IDEAS | 05-2-4: Use power generated from distant sources (eg hydroelectric in Kimberley, PNG...) to produce hydrogen, supply flour by pipeline to distant cities?

05-2-10: Where energy offshore to drive floating desalination plant, pipe fresh water to shore?

05-2-14: Borehole to ca. 3-4 km should provide water at 100°C - should drive steam turbine for electricity & water source.

05-2-15: Sonoluminescence [see Heib 2002] connected with 'cold fusion'. Try with heavy water, D₂O?

05-2-16: Use the 'explosive' problem to some extent and the answer becomes 'apparent' phenomenon in a controlled way?

05-2-18: DNA analysis of rootstocks vs scions to determine (desirable) extent of mismatch / compatibility?

IDEAS | 04-12-11: Personal 'outshower' like car wash - foam rollers extruding warm soapy water, use in chair, esp. for nursing homes etc & people needing assistance, but also popular for 'fun' shower caps, welly masks?

04-12-14: Quasars supposed to be V. distant (hence V. powerful) because of red-shift. Actually have to climb out of immense gravity well, so not so distant?

04-12-16: Plant trees (eg avocados) at Dwellingsup in deep trenches with 30cm topsoil or bottom 2nd class plastic at top held down by rocks etc for trees, mulch, cut-holes in plastic...

04-12-18: Use bioaster in a bacteria to construct very integrated objects?

05-1-7: For there is an atmospheric equivalent to tectonics for above-the-level earthquakes?

IDEAS | 04-11-20: Propose of insects by sucking them through a little propeller or similar?

04-11-20: Start young tender trees down in 50-100 cm pits (to get job-in-pit benefits) also maybe layer of shade cloth over top. Perform pit cylinders as 50 cm pipings?

04-11-20: Could you make an ultralight aerogel in a part-vacuum? Expand with hydrogen, walls porous only to this?

04-11-26: Presumably, a lot of solar energy, electric charges in rain clouds accumulate at the outer surface? Effect of shape etc on discharge?

04-12-10: Arctic power sources - geothermal? harness glacier movement? wind? atomic power? More Hudson Bay?

IDEAS | 04-10-28: Investigate properties of metal in very thin sheets (foil), esp. Na, Si

04-10-28: Investigate retardation in submarine cables

04-10-28: Would some zeolites (natural or artificial) be good for hydrogen storage? Under pressure?

04-11-2: Artificial atoms (w) for room-temperature superconductors?

04-11-12: Embed one-bud rooted cuttings as alternative to grafting? Place roots inside stock bark too?

04-11-14: Remote deep submersibles as a real-time Curvite attraction?

04-11-19: Could a lighter-than-air material be made of 'vacuum foam' foam containing vacuum? Maybe will void relativist differ at nano level?

IDEAS | 04-4-21: Enormous rafts (for mobile agriculture factories large freight items) based on big plastic piping

04-4-22: Sell small seedlings in clear plastic bags with a little moist medium, maybe bundles?

04-4-22: Metallized (magnetic) coating on nylon fishing wire for orbit rings?

04-4-22: Revolve the Earth-Moon system about about its common centre of gravity, so the Earth (and an observer) 'wobbles' in orbit. Is this phenomenon allowed for in various observations?

04-4-23: Material could be transferred from an Earth orbit ring in the Earth-Moon plane to a Moon orbit ring at the position where both orbit rings had the same speed.

IDEAS | 04-10-9: Fruit-fly predators?

04-10-9: Crude vacuum-making device based on revolving-door wrap?

04-10-14: Fine copper grid as root barrier with underground pipe water devices?

04-10-18: The national economy (with interest rates, employment etc) is dynamic and, while tamed only by continual input & output, balanced on a knife-edge

04-10-22 (after 'Catalyst' gathering on burns recovery/Dr Fiona Wood) - late-term (2000) scanning due to body/brain scans to establish nerve ends connected in old pattern after losing matrix? Toxicity by growing nerve cells in with skin cells into collagen (ages, perhaps under electric field patches), or electrophenomena?

IDEAS | 04-9-12: Are cyclones diverted by eg high ground? If so could they be controlled by simulating the effects of high ground etc?

04-9-13: Do strongly-held belief systems inhibit creativity? (cf Susan Greenfield, SA, on 'Enough Rope' of today) Here, is creativity enhanced by lack of beliefs? And so need to replace a boundary parameter in life?

04-9-26: Detect thylazine, Nanny tiger Yeti etc with blanket DNA simple yes/no test of 10,000+ seeds etc?

04-9-29: Do airborne particles make up a significant part of a human's intake of trace elements? (cf lead from leaded petrol). What is the element profile of inhaled air in urban/rural/jungle environments?

04-10-4: Banning flour?

04-10-5: Antarctic heat source for melting ice etc from geothermal bore etc?

IDEAS | 04-7-31: Determine the value of the % average gradient (average over long unit, over 10 cent) at which earthquakes occur. Compare with calculated rock slump values.

04-7-31: Determine individual land-movement rates eg along N America 'Pacific Plate' to show that the plate is an artifact (if rates differ).

04-8-20: Mountain ranges natural outcome of radial decrease. Model with 3 sheets of Cu round roller, secure axis, push down, Model flow with cheese slab weighted or in boxpress.

04-8-22: Bigger, bigger, bigger with light by length extension as Alaska?

04-9-10: Baldness 'cure' to be found in regressing mechanisms by which hairs grow on pubescent males and not females, chest/hands?
