

114

IDEAS 02-7-30: Overage fruit/out trees, make a series of v-cuts in the trunk to bring foliage down to ground level? (For ease of picking, better space-filling, light interception etc)

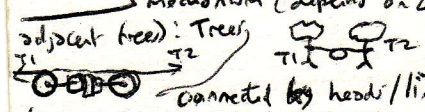

02-8-1: Vast vertical walls of mesh hung from vacuum balloons to create a 'vertical mountain' to promote, collect, rainfall?

02-8-6: Extract/collect encyclopaedia etc by vacuum evaporation from plants in situ?

02-8-6: Feed tropical cattle on sugarcane for appropriate rumen intake? Also: pre-ferment the feed?

02-8-7: Extract essences from leaves of rare fruit trees?

02-8-17: Do people build up 'mental antibodies' to combat the assault of new information?

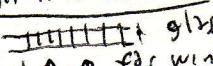

IDEAS 02-6-27: Tree shaker mechanism (depends on 2 adjacent trees): Trees  Connected by heads/lines to central pulleys, pushed apart & released with pistons, springs etc. In row of trees do outer pair then repeat with T2+T3.

02-6-27: Polar ice water: pump/flow hot water on outside/don't take?

02-7-18: Rat maze which delivers bursts of microwave or other sterilizing radiation?

02-7-26: Use friction of vehicles on road surface to generate energy in usable form?

02-7-29: Buy water for Australia from PNG, Indonesia; get from Antarctica.

02-7-30:  Directional 'cell glass' for wind

"Optical Line Transmission" as low as 0.1 dB km⁻¹ are to be found

IDEAS 02-6-15: Anti-glare windows for night driving: (1) photo tropic so headlight patches faded down; (2) Full electronic pixel/optical fibre forest with pixel limitation, infrared enhancement, direct-in-front-view enhancement

02-6-15: Stubby torch which plugs into cigarette lighter in car, permanently charged when needed/removed for use

Before 02-6-14: Nondethal = Bayre

02-6-17: Nondethal source of Rheus negative? How many chromosomes in Rheus monkeys?

02-6-24: How to get polar ice to self-melt & flow to higher latitudes? Is evaporation/condensation easier at high altitudes? Use/natural meteorological flow?

02-6-24: Give corporations & other systems vastus power somehow?

IDEAS 02-6-10: Anti-graffiti coating on walls which can be melted off with microwave/localized heating?

02-6-12: Combat soil erosion by local soil creation top - grinding existing soils & rocks, adding microflora (as a supplement to normal methods).

02-6-13: Gullies in sides of valleys Marineros Moss, due to particle flow on bar very rich conditions?

02-6-14: Make large plastic pipes for eg sewerage with cellular rather than solid walls

02-6-14: Use 'weeping' phenomena to minimize prunus, reduce vigour, promote yields. Research cause of 'weeping' physiology & its induction. (Maybe use weeping interlock, & pipes)

IDEAS 03-3-13: Fit supermarket trolleys with 'Address beacons' which rotate if far from base?

03-3-27: 'Amendable' roadbed material which could be refilled, patched, reformed etc by heat, microwaves etc?

03-3-27: Improved electric motors based on new principles - maglev, piezo-electric etc? Non-magnetic?

04-3-5: Scarer bird on hydraulic pole, lifts up & wings move? (& coils out?)

04-3-8: Na is almost certainly removed from a landscape by bush fires but what about routine processes? Is CH₃ONa naturally vented?

03-4-10: Gun etc based on carbon dioxide ice?

03-4-14: If K-T extinctions due to atmosphere change, could this show up eg in fine structure/isotope composition etc of marine deposits?

03-4-14: If placental isolates factors from mother's immune system, why don't live-bearing reptiles eg baboon gain a similar attack on foetus? Can the placental 'isolation' mechanism be duplicated for eg transplant rejection suppression?

03-4-24: Irrigate plants in containers by passing them through water etc of appropriate fertilizer/nutrient

03-5-1: Elect-tender/male chrysalis by thermodynamic cooling/heating of prospective father's testicles?

IDEAS 02-9-4: Re-treat field crop seeds with light/other em to enhance germination, (activate phytochrome)

02-9-4: Internal dew/water vapour trapping/evolution system (condensation on aerogel, charged grids, etc)  saline water (or fresh water) (or fresh water collection)

02-9-5: Does DNA have 'pop fingers' which blow to fix a cell's function? Is there a broader multi-cell equivalent? How & why are haploid cells (zygotes) produced at particular sites?

02-9-5: Spray 'weed mats' found trees from 'paper-mache' pump virus newspapers or in 'papercrete'

02-9-6: Sodium silicate gels as a culture medium/plant growth factor

02-9-6: Model plant genes & domain relationships by surmounting charges (high for blue, low for dandelion) & check floating.
