

115

IDEAS | 03-1-7: (? Already recorded?) Since wires self-tangle, life/poly-cellular creatures generated automatically from long molecules/structures?

03-1-12: Grow olives or shut, flat-topped foliage exposed to light & fruit harvested by harrow (like tree?) maybe selectively shake off lower parts for part of the year?

03-1-14: Rethink astronomy to take into account spectra of ancient items are vastly red-shifted

03-1-14: Why does the atmosphere not fall to the ground? 03-1-20:

Can economies be treated like connectible gas holders, with gas pressures equalizing as connecting valves are opened?

IDEAS | 02-12-22: Chase mosquito sensitivity through blood transfusions 02-12-27: Mimic mollusc etc processes to construct artifacts from calcite?

IDEAS | 02-12-7: Would watering leaves of a tree help growth? Expt - try watering/not on different parts of a tree

02-12-9: System to make outer skin of machinery/equipment slowly ooze micro-oil droplets for protection?

02-12-11: How do power leads etc self-knit so easily? Could this be a mechanism for making higher life from thin proto-cells?

02-12-16: Better use of water in firefighting - ? Create low ground-hugging fire mist? Power with compressed air cylinders, placed by helicopter in path of fire, activated by heat? Does temperature of water droplets have any effect?

IDEAS | 02-5-25: Find out how eg nut trees go into biennial bearing (shift trees in container from other zones) and use to break synchronization

02-5-29: Yeast as plant germination/growth additive?

02-5-29: More efficient oil fuel steam engine for 3rd world?

02-5-30: Use suitable plant sap (eg Ficus elastica) to seal grafts?

02-6-6: Dark matter (Vers Rubin) & a force, get walls of galaxies (Sandra Faber) explode due to various red shifts

02-6-6: Is a (glow) gravitational explanation of lens behavior possible, similar to lensing around massive stars?

02-6-9: A buckyball structure for hydrogen for fuel cell

IDEAS | 02-5-3: Autodone chevron for good pellicule loosening?

02-5-3: Plant trees in pits/wells to get fruiting canopies closer to ground?

02-5-3: Get hypovirulent strain of *Aspergillus flavus* to reduce Aflatoxin incidence?

02-5-10: Electric bird gun firing ice pellets formed by compressed gas cooling?

02-5-10: DNA mucus pollen analysis to track recent movements of individuals

02-5-14: Fire out neutralization by bringing in (breeders?) hypovirulent and non-inter-DNA strains or other competitive intr.

IDEAS | 01-5-8: Series of siphon links for 'pumping' rivers ground waters?

01-6-4: Optical fibre clumps on roofs etc follow to solar cells elsewhere.

01-6-15: Collect light above clouds with optical fibres?

01-6-17: Adiabatic protective substance in flame tree bark?

Mini plants for plant propagation? 01-6-19:

01-6-18: Solar water distillation using negative pressure/pert vacuum pump?

01-6-21: TV aerial power booster - could same principle be applied to radio telescopes, mobile phones etc? for structure on electromagnetic spectrum?

01-6-22: Biodegradable support tube under new plants full of coccoliths etc.

IDEAS | 02-3-25: Bird scarer: Proximity detector (ex proximity light?) + mow water long-throw sprinkler.

02-3-25: Do any (dear?) angiosperms need the two pollen cells for embryo development to be from different parents?

02-3-26: Aerogel rigid enough to act as vacuum balloon filler - maybe form in vacuum chamber with expandants to bake out before fully set?

02-4-4: Gamma-ray bursts (extreme red shifts) not 10 billion light years away, but high gravity through pass from galactic centre black holes?

Embryonic stem cells from menstrual flow? 02-5-2: Bore water nutrient bacteria harvest oxidation energy - avoid by adding/dosing something to compete

IDEAS | 02-3-5: Find a way to store excess sodium from saline water underneath main plant zone, eg. 3m below.

02-3-5: Retroviruses (proximity activated?) for paracultural edge landing?

02-3-8: Build up artificial 'green friends' on network so that a few users etc might be chatted to (show your back these days?) or love-infocap since these days? (it was variation of common in Victorian times?)

02-3-11: Canopy control in mangos by horizontalizing trees?

02-3-17: Wind-up torch like wind-up radio. Compressed air?

02-3-19: Rabbit control in Australia with ferrets? Cos Dons Campbell
