

IDEAS 02-1-25: Microwave oven to work off 12 volts dynamos? 02-1-31: Seeds have limited viability - use this to research weed seed viability & hence derive treatments to kill them (weed seeds)
 02-2-14: Ooze projects opening, eg 20 pair of Salinity CRC?
 02-2-14: Plant protection & watering jacket with more resin inflated for support after water-filled for combustion (or solvent for polyurethane?) 
 02-2-19: Purpose compaction along windbreaks etc to reduce windbreak row & row-row competition? (row-interraw)
 02-2-21: Force useful ~~the~~ palms (Coco, date...) to succin by chemical treatment of roots, crown?
 02-2-25: Movement of civilization info cap sectors, eg now 4% on Web, up from 2%, 58% in books....

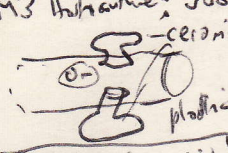

IDEAS 02-1-22 Solution Zones. Are there solution-based analogues to zone refining in metals etc, where the travelling heat ring is replaced by another solubility-affecting factor? Microwave? magnetic? ultrasonics? UV?
 02-1-24: Distribution of elements in the Earth's soil to depend on production in previous eras - more likely a feature of galactic spicule emissions (ex galactic centre black holes?)
 02-1-24: Plant range spread by seeding etc - poorer from lower regions uphill than vice versa because of gravity?
 02-1-25: Dark matter is in black holes at galactic centres? It should be detectable by analysis of movements out from centre
 02-1-25: Radiation from black holes should be enormous by ed-shield, but still detectable by earth orbit

IDEAS 02-1-17: Apply centrifuging to somatic embryogenesis mix to improve polar influence? (x = liquid or media + 2.70mM NAA + 2.22mM BAP) ϕ_0 - electric field
 02-1-17: Use analogue of hygroscopic substance in desert shock cones (water-retention polymers) for in situ germination in arid areas?
 02-1-21: Spines on cacti also help in dew/water trapping/precipitation
 02-1-22: CO₂ heavier than O₂ - in soils may accumulate from root respiration (no photosynthesis). Another reason for root blight? CO₂ 
 Also supply more air through sunken water lines or special air lines?
 02-1-22: Desert auto-watering with 'pseudo cactus' - Zygomatic cell-filled columns with bobbles, spines etc for water retention 

IDEAS 01-11-20: Subsurface water storage - arrange at higher elevations so gravity flow possible?
 01-11-29: A novel premium/prize for people who have their DNA analysed on permanent record?
 01-11-29: Zebrafish etc infocaps density map, with vapour/patch eg university \$10-100 million, the stars etc, spreading out to appropriate size (base star: pop. values)
 01-12-14: Guy wire training/bellies of fruit trees, or use post-hole liners? 
 02-1-7: M ult. - variety rich crops, eg mix several wheat varieties, for (obit) etc
 02-1-8: Adapting microorganisms (bacteria viruses...) more effective? higher info content, than non-microbes

IDEAS 01-10-4: Replace solar tower with solar slots to create precipitative vertical hill ranges? or towers close together? 
 01-10-8: Two-culture continuous wood or veneer?
 01-11-14: 'Tree Tourniquets' to kill (ring-bark) trees/induce fruiting (as cankering?)
 01-11-14: Are fractals a useful tool for evaluating/wing door theory (infinitely detailed situations)?
 01-11-19: The Antarctic pipeline: Start at high elevations, rise for pressure head max-accumulation, with (vacuum cell?) local heating at start (nuclear power station, geothermal near Mt Erebus?)
 01-11-24: A floating concrete support for Sydney & La Moolberg Harbour?

IDEAS 01-9-20: Self-fertile water by heteroploidy or diploid-diploid relatives
 01-9-21: Seed coating treatments using water glass & lime?
 01-9-24: Ceramic based points, coatings, segments for auto-grafting - built off additional (with bases?)
 Carbon nanotubes as nerve regeneration guides?
 01-9-25: Semi-barriers suspended from vacuum balloons (wind turbines?) as vertical mountains to increase rainfall on WA coast?
 Synthetic deserts in upper atmosphere to reduce warming by reflection?
 Clear weeds from air by passing lots of it through filters.
 01-10-2: Corn stalks under roots above water pipes in M3 horticulture

IDEAS 01-9-12: If micro-lensing of star occultations is a gravity-tied phenomenon, can it be duplicated on a smaller scale? Why does light travel more slowly in dense (solids/liquids)?
 01-9-14: With M3 horticulture, subwaters - have ceramic 'shoes' for water/nut delivery instead of PVC etc 
 01-9-14: Long-distance gravity-flow water supply: Use reservoirs/reservoirs with deep sand beds or filters. (Slow but steady delivers)
 01-9-14: Fruit thinning (re ATS, ammonium thiocyanate): can natural mango fruit thinning mechanism be manipulated or transferred to other fruit/nut crops?

IDEAS 01-8-28: Is there a way of extracting H₂ from water other than electrolysis, re the burgeoning fuel cell/H₂ motor usage? Plasma + molecular sieve/membrane? Low pressure to cut out biological? Recombination?
 01-9-3: Develop artificial Corvids as power source? Also would lead to control measures for real Corvids in wild
 01-9-3: "Non-sipping organ" from relative on Atlantic islands?
 01-9-6: Pin hole overhead copier
 01-9-10: If stem cells exist in the body, why don't they automatically repair damaged parts? Is there some way of attracting them/switching on? (re new limb regeneration)
