

121

IDEAS 95-3-9: CO₂ level over decaying mulch higher than over bare ground? Measure - Bar Code reader on phones to read in phone nos, account nos etc?

95-3-16: Rice pump compressed air can get v. hot - adapt to make blast-furnace firelighter?

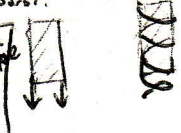

95-5-11: Use day/night temp diff to derive energy? (left large mass with vapour pressure, expansion engine...?)

95-5-30: Lay out boards or wrights-paper rolls sprayed with sun-med-on seeds? For banks, cutting etc?

95-6-12: Calcium carbonate (= oolite) for seed germination?

95-6-12: Screw-in grow base? (or with bars?)

95-6-21: Fibre-optic cable etc lines, if they break break other end

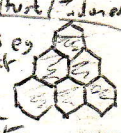

IDEAS 1995 Mars: Grant concrete partitions or part of very long intertidal lake (see Aust IPNG, Aust/Tasmania)

95-3-4: Make domes or Corncorves - construct with hexagonal plastic pipes glued together and kept filled with seawater.

95-3-20: Box fruit with 1 sheet newspaper + sticky tape?

95-3-27: Solar fruit dryer - Seal, install one-way valve so air expansion during day creates negative vapor pressure at night to enhance drying?

95-4-7: Carbonated-lined plant containers (e.g. Forest tubes) for easy extraction & planting?

IDEAS 95-2-19: "Plant Exchange" ship or boat with tissue culture, quarantine facilities etc, travelling world to take on, give out scions, plants tissue cultures of all sorts of useful plants. "In Vitro Voyager".

95-2-23: Produce 'pollinated' clay pieces of correct size to improve sandy etc soils but not blow away

95-2-27: Redwoods & other tall trees at a 100 m height enough to cause condensation as moist air rises.

95-2-27: Detailed study of soil formation through carbon-14 dating of detailed profiles

95-3-3: Test Exp. with infrared chain functions with scale models or computer models?

IDEAS 95-1-5: Long radio waves: is there an undiscovered source of applications at the VLF frequencies & beyond?

95-1-6: What is the basis of various negative groups? What purpose does it serve in evolution, what is its origin? Can it be put to good effect?

95-1-9: Jet / turbo-boats - augment or replace steam with air?

95-1-12: Greenhouse / sea-level: as temp rises, air holds more water - cancel out? 95-1-18? Automatic tapping for rubber, myrrh etc with curling, light-powered cutter

95-1-18: Grow large 'pencil' plant pots from gutter with withhold's water? Collector of small sheets necessary

IDEAS 95-1-21: Plot orthogonous against counter gradients (incl. sea) to check correlation

95-2-15: Birth letterer: Bomb powder up to top of tree, explode to give out lots of (Crickets) etc.

95-2-20: Thermal air column as before (power generation through turbine) but also condensation features all way up to collect water for power generation (turbine) & irrigation. As vacuum or other balloon, maybe.

95-2-21: Pits of old soil drip-line for pots?

95-2-22: Sterilize field soils with moving microwave source progressing over top?

IDEAS 94-12-12: Automated access audio disc delivery service (you sample excerpts from discs, key in your credit card no - perhaps working on Zetabook?)

94-12-14: Mobilize 'umbrella' or mobile phone aerial?

94-12-15: 3D television - just use 3 hologram planes recorded transmitted 1 for each natural eye colour

94-12-19: Pressurize water reservoirs with large concrete or water filled pipes or by air pressure, rather than install water towers - easy to pump in should be same method more flexible & no need for water towers

94-12-22: Mechanical 'fruit bagger' or equivalent? (perhaps operating with continuous paper reeling? with insecticide?)

IDEAS 94-11-10: Can the reflex of an aviator/ev make be made to have intelligence? If so how, & what does this imply for intelligence?

94-11-21: Can we control the soil for wheat crops so it will hold all moisture necessary for crop, and get combat with non-crop crops? (not UK)

94-11-24: Virtual lens: it should be possible to have a wide, flat photon detector and produce a computer image the same as, or better than, that from a lens

94-11-25: Amphibious road? Or one that just a function of minimum emission barrier detection barrier levels? (invertebrate)

94-11-28: Self-righting boats by outpumping of water into compartments?

94-12-6: Personal alarm device which uses mobile phone network & dial emergency phone no, transmit audio, and send messages (in a case?)

94-12-8: Sp (8) on computer?

IDEAS 94-6-30: Very mild microwave regime & metal foil/powder round seeds for germination, growth, grafting?

94-7-28: Royal Zaps - extraction of essential oils by ultrasonic (see Toulouse)

94-8-15: Why do head injuries cause sometimes an increase in aggressive behaviour? Will finding the cause give an effective treatment?

94-8-24: 'Quality Assurance' in beetles, raising children?

94-8-30: Is high electron capture (and hence charge deposits) reason for high apparent density of Mercury?

94-9-27: Kill germs by ultrasonic competing phages germs without bad effects?

94-9-29: 'Aviator' juicers? Pipeline interconnects with grow plants in unresponsive to climate?
