

94-5-8: IDEAS  
 Ultrasonic separation of olive oil? & for cracking/weakening nut shells?  
 94-5-17: Export easy thru pipelines filled with hydrogen-saturated liquid (water? saline solution?)  
 94-5-20: Interpret recent coke libic for cold-hardiness  
 94-5-23: Increase fruitfulness by grafting branch an upside down?  
 94-6-15: Cheap hot water with gravity/connection deep BSM hole?  
 94-6-21: Radar-tracking water gun to discourage birds?

IDEAS | 94 May 6.  
 Fruit production in unlighted covered, with light, & hence heat concentrated above ground & piped in  
  
 94-5-6: For catchment area - cover with plastic sheet covered by rocks?  
 94-5-9: Showcasing growth for water supplies.  
 For water:   
 94-5-10: Pest control: t. level pipes.  
 Look for what pests seek replace it or substitute with lethal alternative - fruit flies = high-sugar artificial fruit; cotton pests eat seeds - breed, feed with little nutrition.

IDEAS | 94-3-22: Archaeological exploration in hostile countries via wilder?  
 Pinhole/dot glasses with high transmission through rotating disc lenses?  
 94-3-28: Pedal-air boots (double) & we-wire sock in to disrupt rain?  
 94-3-31: Heartwood calls most start off as sapwood & convert - artificially promote this in 3 sandalwood ebony?  
 94-4-7: Lose weight by swallowing gauge which rots intestines & reduces absorption?  
 Mid-20s manufacturing? (Plastic plants)  
 94-4-13: Microwave heating for olive oil extraction?  
 Microwave-enhanced combustion in diesel, petrol, steam engines?  
 94-4-20: Bird line or sticky stuff on almost trees to deter birds?

IDEAS | 94-2-18: Long floating 'space chairs' with all conveniences to hard chair?  
  
 94-2-18: If electrical charge build up on planets from solar particles, do long-term space objects have a charge when they descend to Earth?  
 94-2-18: Planets high-low macadamias?  
  
 94-2-24: 'Electric nets' for bird deterrence? 94-3-4 water filled (or chemically) flycatcher for pedal cars etc?  
 94-3-10: Endangering a source of oil? 94-3-11 Commercialize peroxide-bone plastic structure, nullip

IDEAS | 94-1-12: Is there evidence of considerable body hair on early Homo? If so, this could be evidence against early aquatic phase (for that species at least)  
 94-1-16: Is there any evidence of red shift for stars on far side of our galaxy? If so, suggests red shift not due to universe expansion (if galaxies held together by norm. gravity)  
 94-1-20: Large ceramic reservoir for tree crops: Concept: porous ceramic cisterns, filled infrequently (2-3 weeks), letting water/nutrient through (no roots)  
  
 94-1-20: 'plastic ceramic' - plastic material (perhaps with void, expanded clay filler) able to duplicate desirable characteristics of ceramic fibers etc.  
 94-1-27: Chemical means of protection against sunburn, skin cancer, by activating negro physiology? ("Black Like Me", John Howard Griffin, Collins 1962)

IDEAS | 93-12-3: Tree row growth enhancer:  
  
 93-12-4: Faster callousing with dechrest stimulation? water for condensation, cool roots, mulch etc  
 Trained spider webbers to deter birds? (& eat weeds?)  
 93-12-16: Hypoallergenic powdery mildew?  
 93-12-21: Solar radiant balloons thermocouples  
  
 93-12-22: Barcodes on banknotes etc for automatic checking that banks?

94 Nov 6:  
 Electrostatic boots for Arecife take off?

IDEAS | High voltage electricity from plastic pipe 1993-10-22  
  
 93-10-22: Velcro boot/graft/airbag supports?  
 93-10-26: Fruit trees grown in concrete hydroponic bins?  
 93-11-2: Drive form tractor first via wilder, then via wilder-control program  
 93-11-12: Pinhole-effect glasses through a rotating grid? Also for 3-D TV?  
 93-11-19: Put out alternative food for birds to reduce crop loss?  
 93-11-29: Trap birds in cages in fruit trees, release after distress (honey, carved?)
