

IDEAS | 93-9-27: Spinning ocean "wind" electricity

generators made up of linear arrays of rotating rotors?

93-9-30: Are moles evidence of chimera? burrow on human skin?

93-9-36: Cool & frost can be gases by cascade micro-expansion in low pressure/low cells?

93-10-3: P. whole glazes ex cross-hybrid merged optical fibres?

93-10-19: Theme music for local municipalities?

93-10-21: Sugar potato (Cyperus) Gloriosa (rhizome) on bud & grafts set to encourage budding. [with bud stimulant, eg Dormex?]

IDEAS | 93-8-19: 'Inner Mirror' sealed within & not liable to deterioration. Also, is an optic fibre/changing refractive index profile applicable to mirrors & telescopes?

93-8-19: Double-skin inflated greenhouses etc (rather than internal-pressure houses) - notly inflated ribs.

93-8-23: "Synthetic" sand & other products (with insects?) from sea resin?

93-8-26: Tissue culture promotion through oxygen injection? | 93-8-30: Hydroponic "bojars" circulating drink?

93-8-30: PVC homogenized cells/cellulose glue for budding?

93-8-31: Invisible (infrared sensitive) barcodes on vehicle number plates

93-8-31: Antarctic 'post by phone' type services in non-English languages?

IDEAS | 93-7-21: Electricity forklifts powered to give buds? | 93-7-28: 'Solar motors' for slow-moving horticultural devices, based on direct heat/light-motion converters, eg bimetallic strips, heat pistons etc

93-8-1: Pinhole CO2 cones, perhaps all integral on chip? | 93-8-3: Fungi strains to break up clags?

93-8-4: Wood ash suspension (with oil?) or foliar feed?

93-8-6: Tiny self-controlled sun-powered carriers to move goods to remote stations etc? "proceeders"

93-8-12: Termite-repellent gel to coat timber footings, piles etc?

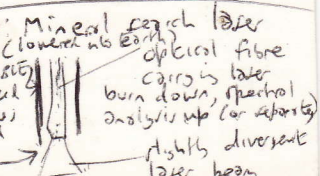

93-8-15: 'Fuel cell/batteries' in which both hydrogen & oxygen are stored and recombined continuously - perhaps in gel or occlusion sponge?

IDEAS | 93-7-6: Turf culture rhizoid & root cells separately & mix at an early or late stage | 93-7-7: Activated charcoal for plant growth? germination?

93-7-14: Intercultural light pipes to melt winter ice, allow cultivation? | 93-7-14: Discharge domes from bottom level to deep sediment - even hydroelectric domes - pressure is the same

93-7-15: Fluid pressure decomposition of rip lines, or rock bursting?

93-7-21: Mineral seep layer probe (lower no Earth) optical fibre carries laser burn down, spectral analysis up (or separate) | 93-7-21: Lightly divergent laser beam

IDEAS | 93-6-12: Autofocus glazes (with built-in rise-finder) - fluid lens for rapid & silent adjustment (or some electron magnetic means?) | 93-6-14

More water collection through evaporation into (inflated?) plastic domes | collection of condensation

93-6-22: Long-lasting foam or seagel (1 month) blobs as bird deterrent? | 93-6-21: 'Painting' by sipping wallpaper & fixing on with UV, heat etc? | 93-6-21: If it was universally cloudy in the Mesozoic, did dinosaurs & dinosaurs have bigger irises or something? | 93-6-30

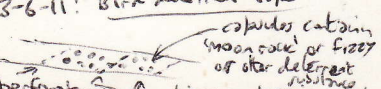

IDEAS | 93-5-9: Are root hairs genetically identical to out of plant, or are they symbiotic?

93-5-25: An infrared solar cell electrical converter?

93-6-2: Light disseminator within house & automatically through internal reflection pipes like optical fibres?

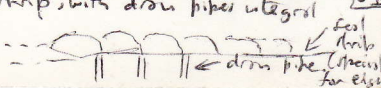

93-6-8: Control weeds by planting an early-competing species which will die later (eg in dry season)?

93-6-8: Artificial sandalwood heart: bamboo stem or similar cardboard filled with KNO3? | 93-6-9: Wall which scratches or remotely signals if graffiti applied? | 93-6-11: Bird deterrent tape

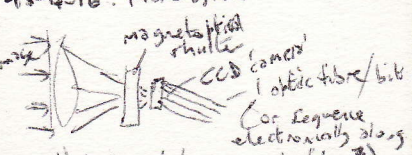

capsules contain moon soil or Gizz or other deterrent substance.

IDEAS | 93-4-24: Follen clay: | 93-4-24: on purpose for 2007 mining? | 93-5-5: Supermarkets in industrial areas? | 93-5-5: Water fogging in orchards as frost protection - work out a stable 'heavy' fog system. | 93-5-7: Memory stored as connections rather than entities, hence long-term retention in spite of molecular replacement - structure remains? | 93-5-26: Distonite/pvc spray for discouraging leaf-eaters? | 93-6-4: Zip-coat inflatable tree houses, made in wide (10m) drip, with drain pipes integral

IDEAS | 93-4-7: Silver 'bowl streets' under trees to catch & fill with water, or to mirror lenses & return angles sunlight lower

93-4-16: Fibre optics

Principle: Concentrate image to tiny CCD device, focusing up into 1/50 sec signals with magneto-optical shutter. Output along fibre optic to experimenter visit at far end | 93-4-20: Animals to eat fallen fruit/seed fruit, eg tarboize, geese? | 93-4-27: Spin-rod cones wing rule CCD cell? | 93-5-4: Sound-powered laser pre-ignited, fan-driven electric turbine generator?
