

125

IDEAS 92-7-27: Control fruit fly etc by repellent (perhaps eg in banana leaves) rather than by killing/eradication?
 92-7-29: Fly-out hatching in giant filter chambers rather than bags - *bristling*

 boiler or throat opening valve → sugar to remove solids
 92-7-31: Do human females produce a transplant rejection suppression drug when pregnant? Can this be used? Does it cause morning sickness, cf. chemotherapy?
 92-8-8: Cyclones must be venting an energy store - prevent by regular pore/venting somehow?
 92-8-19: 'Crop circles' from spherical electric effect (cf St Elmo's fire) collapsing?

IDEAS 92-6-12: Is the spread over whole of average interplanet orbit or whole of outer-sun space, subject to some regularity/periodicity. (eg dinner 5/clock w/ space)
 92-6-16: Shoulder hydraulic rock-breaker - hammer, surger along line 1, 2, 3, 4 etc then repeat

 92-6-16: 'All-round' nut cracker which will bring in multiple blunt fingers to crack many points simultaneously - hydraulic to equalize pressure on different points.
 92-6-24: Turbine or other new-made *the an engine* (eg orbital etc)?
 Also steam-driven electric generators
 92-7-27: Prevent locust plagues by chemical/behavioural treatment of 'solitary phase' insects to clip chase to swarming phase?

1992-Jun-20. Speed of light.
 1) Reproductive index less than 1.0 implies light speed > c.
 2) c varied with age of universe, or per Dirac?
 92-6-5: Map projections of Earth replaceable by 6 x 90° holographic images? Can work in later direct?

92-6-27: Swiss knot seeds for DNA in self-organizing 'paperlike' pads - close with natural self-organizing mechanisms
 include plastic 2-year 'flavour'?

IDEAS 92-5-4: Recalling images. Economical picture recalling through only centre in detail or human vision - perhaps through twin lenses as holograph
 92-5-4: Not Big Bang, not steady state, but Unifinity Jussing - an utterly uniform space-time nudged into non-uniformity (by chance?)
 92-5-8: Great fire sprayer systems for forests - with water guard?
 92-5-8: Raw material with water replaced by hydraulic arms (wheels - hydraulic) driving 2 handles/wheels or reels
 92-5-12: Cooled ferrogels or very high capacity capacitors (power-pacces)?
 92-5-18: Transport hydrogen in water? (perhaps loosely by permeation rather than physical transport of water?)
 92-6-5: Is the 10¹⁰ reflection of planets) stars, planets in the continuum

IDEAS 92-4-9: Could you make monatomic oxygen by a special electrolysis, eg with needle electrodes?
 92-4-9: Cyclone cloud patterns resemble what galaxies - is there a parallel mechanism in their formation?
 92-4-23: Use V-shape brackets to get tidal bore effect for power generation (higher head)
 92-4-23: Could oblique principle be used to concentrate wind energy, too?
 92-4-23: or light funnel for house & building illumination?
 92-4-28: Does light pressure only light have some tiny mass? or what?
 92-4-30: Pressed clay blocks/blocks with just outside free by eg laser rearview?

IDEAS 92-3-20: Could you have stereoscopic eddylorke / seismic recording, plus holographic images from the 2 receivers?
 92-3-28: Combine underground drainage system with dams. Possible to use natural hard for some pumping? (underground dams?)
 92-3-28: Scratch buds on grafts, or apply coconut-water, to promote bird-bait?
 92-3-28: Rotating mirror on cycle handle / axle to draw off?
 92-3-26: Electric substitution on top of poles, both buildings, etc with underground power? noise small and reminiscent of trees?
 92-4-2: 'small' cell capacitors for batteries (optical) using thin techniques
 92-4-3: Reclaim water meter/wave distance finding by using 2x wavelengths?

IDEAS 92-3-11: Another gyms in reverse direction (not same as Earth rotating) → or an elliptical orbit to avoid collisions? or 2x satellites in figure of 8 orbits round moon or other mass?
 Question 92-3-11: Golob will shrouse by virus - use for stimulating? Buckeyballs - N/p, logs? add extra groups through N or P?
 92-3-12: 'Trap mats' - small mats laid in gardens which attract particular pests - disposed of in bins with their contents
 92-3-13: Range-finder in cars etc for better control?
 92-3-13: Smaller connected by winks one side in reverse? (spools can be close together)
