

**IDEAS** | 91-12-2: Is a neutrino microscope possible? Do natural neutrino-focusing objects exist, or stars?

91-12-11: Can number of mineral deposits be mathematically correlated with extent of domain-edge interaction?

91-12-14: Freeze enzymes/placenta at birth - should be a ideal source of cells for culture etc labor

91-12-20: Does greater dirt/s/breath mean more global winds/air circulation or solar radiation is diverted from plant growth?

92-1-9: If phones etc detect prey electric current impulses can eg shark detectors be constructed by artificial current patterns?

92-1-9: What is the wavelength of neutrino streams? Are they bigger than the size of the Earth? Can they be detected with a 'long' object?

92-1-16: Do human hair glands put out more oil than those of higher species? (affects aquatic spec)

91-12-20: Is there a relationship between the eccentricity of a planet's orbit and its axis or polarity axis + distance from sun (or gravitational field)?

**IDEAS** | 91-11-1: How developed feet for walking in the feathers developed from hair? Feathers principally keratin? Hence birds developed from mammals?

Also: Bats developed in Gondwanaland, hence orig. from there?

91-11-4: Make seed gardens on vacuum balloons around the world to take advantage of westerly etc

91-11-6: Detect fossils in rocks with ultrasonic 'radar'?

91-11-8: Huge machine crushing fruit food forms for eg Japan (land power)

91-11-11: 'Pacemakers' to stimulate the brain for cerebral palsy etc sufferers?

91-11-11: Development of computer-controlled TV images by studying changes in each successive frame (locokin, new demands etc) can be developed into creating new images Most analysis of the natural change mechanism

91-11-11: Is there a self-boring technique which will bore a projected image and send up (overriding) what's there?

**IDEAS** | Add PAX to Infobank facility? 91-11-14

91-11-19: Square hole digger

1991-11-21: Use Moon for 'high heating'?

1991-11-25: Is the CO2 content of air less at higher altitudes? Could this affect growth rates of marine species/vari?

91-11-26: Aeration to counter algal bloom?

91-11-28: Recognition and analysis is through 2nd dimensional pattern matching - the way, surely, everything. Hence can dull etc difficulty (eg weather forecasting)

**IDEAS** | 91-10-5: 'Buster' based on giant inflated rollers or wheels?

91-10-8: Re-use boots, perhaps as 8-layer 'spike-boots' with long hydraulically-operating arms to maintain level

91-10-16: Tampax-applicator principle in planting trees by machine?

91-10-16: Tropical countries selling water by giant gravity pipelines to sub-tropical/temperate ones?

91-10-21: Nickel-iron meteorites/asteroids from comets etc pass so close to sun that not evaporated?

91-10-30: Microwave emitting Diode in insect trap?

91-10-31: If (grass) covers (vegetables), does that imply weeds in an area quantify of space-time envelope, not mass a point one?

**IDEAS** | 91-9-23: A 'wave' is a rotational concept for a means of transferring energy. Hence no gravity waves (no energy transfer)

91-9-23: Spin up colliding planet with ultrasonic to generate best embryogenesis conditions?

91-9-30: Uses for polarized sound waves etc? Can you have sound holograms?

**IDEAS** | 91-9-12: Foot-mary particles (eg from sun, cyclotron) all lack 'electron shells'. Is there a useful analogy in the electron overshoot of nuclei being dragged off by the high speed, & rate of space-time envelope (etheric) friction?

91-9-17: Make new fruits etc (tetraploids?) by replacing cell DNA with DNA from a fruit, dually?

91-9-20: Does soil moisture etc evaporate/transpire in big enough units to carry significant non-volatile salts with it? This could have useful applications -

91-9-20: Build dams in 2 stages, with first entered shaped to give maximum sedimentation and automatic (sur-powerless) clearing in dry time?

91-9-23: ~~Gravitational~~ Gravity waves do not exist, any more than potential energy waves exist from a mountain.

**IDEAS** | 91-9-2. Extra yield, greater control in horticultural crops by channelling in extra light through 'light conductors', optical fibres, from extended collector areas

91-9-5: Open-plant seed/seedling with a wick/conduit cylinder, pulled thin (low)? (perhaps paper-made?)

91-9-5: To combat rabbit etc problems with new weather, perhaps new

91-9-6: Air droplets of flat seed packs contain soil, seed etc in a paper-maché envelope?

could be square, circular, or hexagonal.
