

IDEAS | 92-2-19: Is food that connected with atoms being proton electron based, rather than sub-atomic/positrons? | 92-2-20: Optical fibre scopes & pipe tunnels; homing in on a piped radio target probe? | 92-2-27: Induce secondary heating on a ring of leaves, then induce new plants from the haustoria? | 92-2-29: Warming underground greenhouses: sun warming pipes

closed loop heating pipe

92-3-5: Revised beds for seedling/nutrient production? | 92-3-10: Use double-sided tape to discourage insects crawling up trees, big pots?

IDEAS | 92-2-1: Imitating examples as a principal form of interaction, esp. for females | 92-2-3: Bush fire control by regular removal of leaf litter? | 92-2-5: Virtual Reality machines for brain damage exercising? | 92-2-5: 80 methane free communities through ethylene (Regard 2000 program) | 92 Feb 10: Absence as source of regenerative chemicals - Cuban research RN 8300n | 92-2-12: Corand of sun hotter than sun's surface because of mean free path considerations? | 92-2-17: Carbon-14 ratio in atmosphere same as CO2 level increases? (suggests CO2 increase from forests, not fossil fuels) | 92-2-18: Extract 'unavailable' phosphates from soil, powdered rock with natural phosphate-grabbers (eg Protease?)

IDEAS | 92-1-18: If a directional gravity detector was in orbit above Earth, Earth's gravity should be highly cancelled out, hence gravity of other objects (Sun, Moon, Milky Way) should be easily detectable - in solar orbits might be possible to detect other stars systems (planets?) | 92-1-19: Domestic/periodic machines (eg lawnmowers, lawnmowers) powered by exchangeable rechargeable cells? | 92-1-20: Could we determine prehistoric disaster from chemical etc composition of fossil water? | 92-1-20: Is the purpose of mosquitoes to effect gene interchange? | 92-1-21: How does sapwood turn into heartwood? What's the purpose & control of this for the plant? Can it be mimicked? | 92-1-22: Seal foxes as biological buckets building up a prey randomly? | 92-1-24: If human information recording is essentially 2-dimensional, does the brain neuron have an analog?

sidereal period of Earth
11.8 x
365 / 4332 J.
365
4680
365
3170
2920

sidereal period of Jupiter

Synodic cycle ≈ 11 years

(92-1-29)

IDEAS | 91-8-25: Sodar (interregional?) for archaeological 'diss' on large scale, eg D, about? | 91-8-26: Do Antarctic ice cores have discontinuities, caused by hot periods making ice cease to form? Could much higher CO2 levels in the past be hidden by this? | 91-8-26: Obligatory self-broadening devices on firearms? | 91-8-26: Possible to detect unsaturated forests from small molecules? | 91-8-26: High atomic-weight stems from intra-plant reactions rather than ultra-stellar processes? | 91-9-1: Germinate large seeds eg in wet gravel? Do the larger holes help? | 1991-9-2: Is it possible to construct an ecosystem which will self-optimize (no physical movement) to a given source/destination (eg for mobile plants)

IDEAS | 91-7-31: Sell seeds in tape strip form with seedbed (hydroscopic stuff etc) attached to tape? | 91-8-2: Thermocouple-based power source with one junction heated by IRAS or fibre-optic concentrated sunlight? | 91-8-2: Composite lenses using optical fibres?

1991-8-17: Borebirds 25m

Drill oppositely-pitched pairs of helical holes thro' spine insert wires, plastic wire, or the malleting/cup? gives thro'

91-8-19: Did the ratites ever fly? - are they really 'feathered' for them?

IDEAS | 1991-6-13: Wound & egg/placental cells may both give out rejection-suppression substances to enable embryo attachment. Can these substances be synthesized to permit organ transfer, organ vial growth etc, with out rejection/suppression? | 1991-6-29: Swinging the corrugated sound tube produces progressive harmonics depending on the size of the corrugation. Is there an analogue for electromagnetic waves? | 1991-7-2: Can we have a stereoscopic/holographic analogue of 3-D vision for sonar, radar, etc, using 2 eyes? | 91-7-25: Perhaps galactic planets etc orbit because they must - if they didn't they would escape or fall into the center of gravity. Some other, other orbit rates are correct for determining mass

IDEAS | 91-5-16: Carotidary forms? | 91-5-20: Is there a 'substitutional' analogue of Archimedes' principle applicable to gravitation? Can it be used in gravity determination? | 1991-5-26: Do birds navigate by 'dead reckoning' on migration i.e. do they have v. accurate 'inbuilt' clocks? | 1991-5-26: In-situ remote spectroscopic analysis of down drill-holes, one optical fibre taking laser light down, another collecting result & returning to analysis equipment on surface. | 1991-6-5: V. low frequency radio for control minis robots? | 1991-6-12: Could 'drowning' shut-down be artificially induced for special medical procedures to occur? | 1991-6-12: Do people grow more at night (=2 cells), less hours? how many sleep?
