

IDEAS | Info on planetary rotation

- 91-5-3: Air-layer Lid layer surges, then grow from rock crust?
- 91-5-6: Sea water volatility most increase with increase in the depth, as they are baricly fresh water
- 91-5-6: Do revised mountains, plateaus etc mainly flow, like glaciers but with more clouds?
- 91-5-8: Use the explosive pressures built up by fermentation for engineering etc purposes?
- 91-5-9: Can genes be exchanged between unrelated species through action of viruses etc? Can this be used? Is this why horizontal genes in bacteria?

IDEAS

- 91-4-8: Is the whole universe rotating? How can we tell? Does this cause the expansion (centrifugal force?)
- 91-4-22: Replace vht electric power lines with hydrogen pipelines + local H₂ fuel cell
- 91-4-24: Custom catalytic surfaces from i.c. techniques eg electron beam deposition, sputtering, thin movies, laser selective etching etc, + silicon microstructures
- 91-4-26: Compressed H₂ stored in water for power source? Would this be transportable by pipeline?
- 91-4-26: Molecular sieves through silicon microstructures - vht curved tunnels etc to vary length/diameter characteristics

IDEAS

- 91-3-22: Continuous nitrogen injection directly into fruit tree trunk?
- 91-3-28: Bazzani root grafts with different species or root initiator? (of what gain)
- 91-4-6: 3-D telovium based on arrays of signal cups, with bottom displays varying with position on cup? Holographic imaging 3 wavefronts for image 3D?
- 91-4-6: Hydroelectric power by reducing local sediment & using fill from present sediment on bumbies?
- 3rd world life unit 1991-4-6: Hydrogen, solar cells, microwave cooker, Hydrogen, cooler, water distillation, bio-gas production & storage, hydrogen electrolysis unit, ship in william

IDEAS | (indicated?)

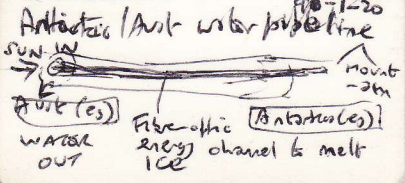

- 91-1-22: Make space shuttles huge and very light so that they are not pulled down so quickly and so need less initiation, protection?
- 91-2-6: Electro Rail rocket launch off Chamberazo, Ecuador
- 91-2-15: How do control achieve the split of chromosomes to give egg & sperm? Is this process controllable to yield unid. selection?
- 91-2-22: Security video comes to record eye on write-once paper discs, trace elsewhere to decide if needed.
- 91-3-5: Mobile car repair services with towed car hoists, canvas covers, mobile parts couriers?
- 91-3-9: Whiter, r substances for stabilizing soil structure, earth bricks?
- 91-3-22: Alongway fibre composite for research, maybe cold-rolled in like puff pastry?

91-12-17: Top freshwater aquifer under sea, if they exist?

91-12-23: If disturbing the inner core of earth does cause cancer & death, is there a similar dose in human animals which is disturbed to cause cancer? Is it the heart-beat clock? (ie the natural pacemaker?). Do 'carcinogens' act by disrupting this clock, working by affecting cell-division process timing?

1990 IDEAS

- Dec 12: Thick foam uproy on existing roofs for insulation/waterproofing?
- Seedling trench 90-12-20 (not vinyl) trench lined with waterproof coated with glue contains copper salt to halt root extension, filled with potting mix
- Bird control with noise - hot loud pressure, rather than exploding cartridges? 90-1-1
- Why are galaxies flat? Do they originate from a central black hole or some such which is spinning? & also for planetary etc systems?
- Antarctic / Arctic water pipeline 90-1-20

91 Dec 8. Annual grants detection. Can animals, plants, people detect the position of the sun and moon [from their gravity?] (Earth would appear as a 'light spot' in a dark hemisphere, the 'brilliantly' - 'the lower hemisphere' bits due to the Earth's gravity). This could be tested with people in an underground room kept on a 24 hr cycle. Tests must be affected due to whether room was dark or not. If detection of sun possible but not moon, implies eg neutrino flux detection.

1990 ZDWS

- Nov 3: Giving manholes to reduce road toll?
- Nov 4: No resin for laser strikers near Earth's core - gravity there = zero
- Nov 14 - Humboldt's elephants - Africa ones? (not mainly domesticated)
- Nov 14 - Fuel cells run directly off wood or a simple derivative?
- Nov 1 - Fuel cells run off hydrogen or ethanol - an electric storage mechanism?
- Nov 14 - Analysis of human racial genes should show day connections - human ancient races eg 5.6m, Europe
- 1-5? - produce volt by evaporation on ocean - floating automated rafts?
- Dec 6. Cut light for fibre-optic channel supply from high atmosphere (vacuum balloon?) collectors
- Dec 9: Perfected 'android' or solution to overpopulation problems
