

INTERLOCKING TANK BRICKS

(Circular)
Build up water tanks etc
from 2 layers of interlocking
bricks. Water pressure will
create some sealing pressure.
Could have plastic liner
sealer face. Also could
have rods through
bricks to give stiffness,
prevent whole layer
sliding, or suitable
depressions/protrusions in
upper/lower rows.

MAGNETIC CLUTCHES & GEARS

1985 Aug 25?

It may be possible to make efficient clutches & gears based on the
idea of magnetizing areas to get adhesion, and changing those areas
(electromagnetically) to get gearing - a set of magnetic pseudo-sprockets

CARBON-FIBRE KNIFE

1985 Aug 28?

Carbon fibres may be usable to make a type of knife based on
the cheese-wire principle.
