

EXPANDING BIRTH & PETROLEUM

195

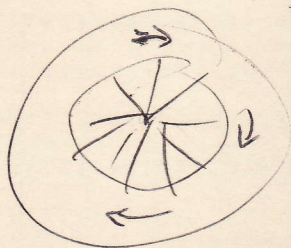

1984 Apr 2

Although petroleum deposits migrate into available porous rocks, consideration of eros when continents split may aid in locating suitable host areas. Or vice versa.

FLUID IN WHEELS

1983 Jan 2

Wheels on bicycles, etc, with the 'tubes' filled with water instead of air should have some interesting effects and uses.

The water would add significant mass to the 'flywheel' effect of the tyre, and should continue to circulate (maintaining angular momentum) when the wheel is stopped.

'PERSON'

1984 Feb 6

Needer - an 'Eliza-like' interface program running public terminals, able to connect to appropriate ^{on-line} services wherever. Should have large store of decision data as well as good bedside manner.
