(3.35 am)  
Method of killing  
weeds & fleas

To Balthaz weeds but not  
humans need to exploit  
a distance between the  
two -  
how about "battering" -  
insects get this  
air through spiracles (?),  
punct holes, through which  
air penetrates.  
Fire some way or  
killing these minute holes,  
wsp (water?) (for?)  
(chemical) cow's eggs  
& fire?  
and sugar!
