

HEAL-RING GRAFTING

208

1983-5-25(?)

Tree branches & twigs have a varied 'healing ring' at their base which initiates rapid callusing & a healing-over of the stub if a branch is broken off.

If a way can be found to fix it on, a graft ^{cut} placed against this healing ring might be able to take advantage of this callusing/healing ability.

POWER SOURCE FROM DIURNAL VARIATION

1983-5-25

Almost everywhere, there is a significant difference between minimum & maximum daily temperature - especially in the open.

This temperature difference could be exploited to provide power.

FREESTANDING TELEPHONE UNIT / 1976M

1983 May 25

For a completely mobile (cordless) telephone unit, need:

- 1) A transmit/receive unit, eg. a dish (AI sat?) or equipment to automatically home in onto an appropriate satellite (sun powered)
- 2) A handset/computer terminal etc, with radio/infrared connection to (1)

Should be all-digital transmission mode.
