4 AN OUNCE OF SYSTEM DESIGN IS WORTH A TON OF PROGRAMMING

HOLOGRAPHIC PDZ / TELIDON ETC

1982-12-15

The Picture Description Instructions (PDZ) used in TELIDON-like ~~video~~ video text systems could be ^(representations) _(encodings) of holograms of three-dimensional objects. This could be a simple way to, for example, (three-dimensional) television.

DECLINING VISION

1982-11-19

Why do people need glasses as they get older? Perhaps many do because of the usually-stated reason, i.e. weakness in the focusing muscles of the eye. But could another cause be deterioration in the eyeball-wobble mechanism which allows scanning (spreads the sharp-focus area read by the retina)? Could this be improved in some other way than glasses (which may be just artificially reduce the scanned area)?
